PROFILE

Motivated and skilled Full Stack Web Developer specializing in the MERN stack, with a strong foundation in both frontend and backend technologies. Proficient in HTML5, CSS3, and JavaScript, with expertise in Node.js, React.js, Express.js, and MongoDB. Experienced in creating responsive web designs and adept in using version control systems like Git and GitHub. Competent in programming languages such as C++ and JavaScript. Seeking an opportunity to leverage my skills and contribute to a dynamic and innovative organization.

PROJECTS

ChitChat
MERN | Redux TK | TailwindCSS | Socket.io

- Implemented one-on-one chatting with future plans for group chat functionality.
- Integrated socket.io for real-time communication and Redux Toolkit for efficient state management. Utilized TailwindCSS for styling and creating a modern, responsive design.
- Managed user authentication and authorization to secure conversations.

Spotify Clone
React.js | Context API | Vanilla CSS

- Developed a Spotify clone using React and integrated Spotify API for real-time music streaming.
- Built responsive and interactive UI components to mimic Spotify's interface.
- Utilized state management with Context API & React hooks to handle user interactions and playback.

Little Lemon Restaurant
React.js | Vanilla CSS

- Created a restaurant web application using React for a seamless user experience.
- Designed and implemented features for viewing the menu, making reservations, and placing orders.

CERTIFICATIONS

Front End Developer Specialization - META, Coursera

Backend Apps with Node.js and Express.js - IBM, Coursera
